RESEARCH & EXPERIENCE **Adobe, Machine Learning Team** San Francisco
Software Engineer May 2017 - Present

Cloud computing and infrastructure for fast, large scale distributed deep learning. The purpose is to investigate and deploy new ML algorithms at Adobe.

Umbo CV Taipei, Taiwan
Software Engineering Intern Summer 2016

Developed a demo to perform online few-shot learning with a basic laptop and webcam. Using an additional ML architecture, this model automatically expands its final layer to learn new objects in real time.

UC Berkeley EECS & Berkeley National Lab Berkeley, CA
Research Programmer August 2014 - May 2017

Created a video segmentation algorithm for automated data collection and processing of rotating *E. coli* video streams.
